

## SAMPLE EMAIL

Dear *friend, relative, colleague, etc.*

The present economic depression is a result of Wall Street's fraudulent gambling and the Federal Reserve Banking System. An Act has been introduced, The National Emergency Employment Act of 2011, NEED Act, that will enable a full employment economy, pay off the national debt, rebuild infrastructure, and provide needed government services without additional debt or cost of interest on borrowed money. Full text of the Act can be read at: <http://www.govtrack.us/congress/billtext.xpd?bill=h112-2990>

The Act removes the power of banks to create credit that we use as money. Credit cannot exist without someone going into debt. This system has put the federal government and all other sectors of the economy into un-payable debt. It is impossible to borrow ourselves out of debt.

The Act returns the Constitutional power and obligation of the Congress to create our money debt and interest free according to Art. I, Sec. 8., Cl. 5.

The big banks got bailed out, now we can bail out the American people.

Congress gave away our money, now Congress can take it back by passing the NEED Act.

We must have your help to get this Act passed. Please, write, call, or email your Congressional, state, county, and city representatives. Stay on them until they agree to support this Act. (*Customize this paragraph to the recipient*)

*Suggested additional talking points that may be customized to recipient:*

Direct, tax free, grants to "bail out" the people.

Direct annual grants to states.

Interest free loans to local jurisdictions such as cities, counties, school districts, etc.
